Internship Opportunity

FULL STACK SOFTWARE ENGINEER

We're always on the lookout for new talent and ideas. Software engineering students with a passion in Internet of Things (IoT), data science, and full stack application development are welcome to apply for our internships.

What do we look for in our interns ?

- Keen, committed, and enthusiastic individuals with a particular passion for the technology areas that we work in
- The necessary technical skills and the need to build your expertise
- Proactive and bold enough to experiment with technology
- A fast, self motivated learner who can work independently

What are the required technical skills?

- Passion for building complete software applications
- Hands-on experience in designing, developing, and hosting applications technology stack - Java as a main language is preferred, but not a must
- Familiarity with a database engine and SQL

What will you gain from this internship?

- Build your technical and soft skills
- Gain exposure to industry best practices
- Learn from industry experts who have worked with global Fortune 500 companies and SMEs
- Contribute to multi-faceted projects and solutions
- Find your voice and build your personal brand in the industry
